Milestone 9 Core Map Interactions (3 of 3)

Due: Wednesday, May 10 at 1pm

- Your goal is to *finish* the core map/geo interactions of your app. Make sure to hook up to the final data sources that you want to use. You should have implemented non-trivial additions and improvements from Milestone 7.
 - If you want to do more by this milestone, then go for it :)
- Create a `milestone9.md` Markdown file in GitHub repo, containing:
 - Description of what each team member has done on the project since you wrote up `milestone7.md` for Milestone 7.
 - At least one screenshot of your app's core map functionality along with a description of *how this feature has improved since Milestone 7*.
 - You can include more screenshots if you want!

First 10 minutes: show off interesting video prototypes from Monday's in-class activity

In-class activity for Wednesday and Friday:

- When you visit a team, get them to demo their app to you. It doesn't have to be super-polished at this point, though. (If you're giving feedback remotely, just look at the milestone7.md file, even though that's not ideal.)
- Feedback format: "You should do the following to complete core map/geo ..."
- All teams who got visited **MUST** fill out <http://shoutkey.com/speech>
 - (if some team didn't visit you, then mark them as absent)
- Each team should add feedback as a single comment to the "Milestone 7 feedback" GitHub issue. *But each team member should leave individual feedback labeled with their name.*

Team A3: Our Awesome Team Name

John:

You should do the following to complete core map/geo ... <paragraph>

Jane:

You should do the following to complete core map/geo ... <paragraph>
